Summary

4+ YOE engineering high-performance REST APIs, concurrent microservices, and robust backend systems using Go (Gin) and PHP (Laravel). Highly skilled in goroutines, channels, JavaScript, and Linux environments. Proficient in distributed messaging via RabbitMQ and AWS SQS, alongside cloud deployments using AWS (EC2, S3) Redis, Docker, MySQL, and JWT auth.

Experience

DDSPLM Pvt Ltd

July 2022 – August 2026

Software Developer – Go (Golang)

Gurugram

- Developed and maintained scalable backend services and RESTful APIs in *Go (Gin)* for multi-tenant SaaS, Project Management, Asset Management, and APQP applications, with *MySQL* as the primary data layer.
- Leveraged Go's concurrency model (*goroutines*, *channels*) to optimize bulk data processing and background job execution, improving API throughput and response times.
- Designed and implemented AI-powered engineering drawing analysis and automated ballooning using *OpenAI GPT Vision APIs* consumed via Go services, extracting GD&T symbols, dimensions, tolerances, and inspection characteristics to streamline quality processes.
- Integrated enterprise and third-party services including *SAP*, *Zoho*, *Grok AI*, *Microsoft Azure AD*, *Google OAuth*, *Twilio SendGrid*, and *Netcore* into Go-based backend workflows to enable authentication, AI automation, and communication.
- Automated PDF generation, email notifications using *AWS SES*, scheduled background jobs, and server operations using *Cron Jobs*, improving operational efficiency and reducing manual intervention.
- Designed and maintained *CI/CD pipelines* using *GitHub Actions*, *Docker*, and *AWS*, automating build, testing, and deployment of Go services to accelerate production releases.
- Built interactive dashboards and reporting modules using *Google Charts*, *Chart.js*, *FusionCharts*, *AJAX*, and *MySQL*, providing real-time insights into project progress, KPIs, and quality metrics.
- Developed document approval workflows, version control, and secure file management by integrating *AWS S3*, enabling traceability and compliance for automotive APQP documentation.
- Also maintained and extended earlier modules built in *PHP (Laravel)* and JavaScript/jQuery, ensuring backward compatibility during the team's migration to Go.
- Collaborated with cross-functional teams in an Agile environment using *Git*, delivering secure, scalable, production-ready backend solutions with seamless frontend integration.

LCMHCF Pvt Ltd

Dec 2021 – June 2022

PHP Developer

Delhi

- Developed user engagement features including posts and reviews using *PHP*, *Laravel*, *CodeIgniter*, *MySQL*, *JavaScript*, *jQuery*, and *AJAX*, enhancing community interaction.
- Implemented secure authentication with *Google OAuth API* and OTP verification, strengthening user account security and login experience.
- Built dynamic CMS modules enabling administrators to manage *navbar*, *carousel sliders*, *banners*, and *footer content* without code changes.
- Integrated automated email workflows using *SMTP*, delivering account verification, notifications, and system-generated reports.

Technical Skills

Primary: Go (Golang), Gin, Goroutines & Channels, gRPC, REST APIs, JWT Auth

Secondary: PHP (Laravel), JavaScript, jQuery, React Js

Database: MySQL, Redis

DevOps: Docker, Git, GitHub Actions, Linux

AWS: SES, VPC, S3, Load Balancer

Front End: HTML, CSS, React Js

Projects

SkillUp LMS (AI-Powered Learning Management System) | Go, React, MySQL, AWS, REST APIs 2026

- * Architected a scalable microservices-based Learning Management System using Go (Gin), React, MySQL, Docker, and REST APIs, enabling modular, high-performance backend services.
- * Developed an AI-powered adaptive assessment engine in Go, integrating Groq (Llama 3.1) APIs to generate personalized practice tests based on historical student performance and weak-topic analysis.
- * Designed high-performance RESTful APIs using Gin, implementing JWT authentication, role-based authorization, request validation, and efficient service-to-service communication.
- * Optimized backend performance using Go's concurrency model (goroutines, channels), efficient SQL operations, and bulk data processing, significantly improving API throughput and response times.
- * Implemented large-scale Excel import pipelines using XLSX parsing and transactional database operations, enabling bulk onboarding of students and question banks with minimal processing time.
- * Built an intelligent learning engine implementing mastery-based progression, spaced repetition, and AI-assisted mistake tracking to deliver personalized learning experiences.

SmartAPQP – APQP Management Software | Go (Gin), MySQL, JavaScript | Live 2022 – Present

- * Developed a comprehensive APQP (Advanced Product Quality Planning) management platform for automotive and manufacturing industries, streamlining quality planning and new product development processes.
- * Implemented workflow automation, document management, and notification systems, significantly improving operational efficiency and reducing manual effort.
- * Built quality control features including Failure Mode and Effects Analysis (FMEA), Control Plans, and compliance tracking to support industry standards and regulatory requirements.
- * Developed real-time dashboards and reporting capabilities, providing actionable insights into project progress, resource utilization, and quality metrics.

SmartALM – Asset Lifecycle Management | Go, PHP, Laravel, MySQL, JavaScript | Live 2024 – Present

- * Developed an enterprise Asset Lifecycle Management solution for manufacturing organizations, enabling end-to-end tracking of assets from acquisition to disposal.
- * Implemented service, warranty, and ticket management modules for efficient issue tracking, resolution, and asset support management.
- * Designed role-based access control and audit trail mechanisms to enhance security, accountability, and regulatory compliance.
- * Enabled comprehensive asset history tracking and performance analytics, supporting data-driven decision-making and asset reliability improvements.

Education

Babu Banarasi Das University <i>Bachelor of Computer Applications (BCA)</i>	Sep. 2017 – May 2020 <i>Lucknow</i>
Indira Gandhi National Open University (IGNOU) <i>Master of Computer Applications (MCA) (Pursuing)</i>	Jan. 2025 – Present <i>New Delhi</i>

Interest and hobbies

Reading books, videography, and fitness.
